

**Grouping for sustainable society near future with 7billion population
on the earth from the viewpoints of Finance, Food and ICT sectors.
09:00-10:30, 18th of June 2012
Bandeirantes Auditorium**

OVERVIEW

This session will gather executives from leading Japanese businesses to discuss innovative approaches that their companies are taking to advance sustainable practices and to contribute to addressing global sustainable development challenges. Representing Finance, Food and ICT sectors, each presenter will highlight forward-looking approaches and solutions to ensuring a positive impact of their strategies and operations. The emerging practices highlighted will initiate a conversation among the chief executives regarding the types of collaborative actions needed to be taken in Japan to build a better, more sustainable society throughout the region.
